

Mobile workplace BCT on the GO

The ideal companion for flexible use

The mobile workstation "BCT on the GO" is the ideal companion for flexible use in incoming and outgoing goods, inventory work, quality assurance or order picking. With the integrated battery, you can use a PC including monitor and label printer on the move or charge barcode scanners independently of power connections.

The height-adjustable work surface allows users to work ergonomically and without fatigue, while the stable construction ensures safe standing and transport.

With the variable modular system, you can assemble the BCT on the GO entirely according to your requirements and thus obtain the ideal mobile workstation. There is a choice of different holders, drawers and castors for outdoor use, as well as a battery change system for 3-shift operation and round-the-clock availability.

Deep-freeze model

The mobile workstation BCT on the GO is also available as a version with a dust-proof and splash-proof (IP65) housing for

Mobile workplace BCT on the GO

applications in deep-freeze rooms. The additional insulation protects the electrical devices from low temperatures, allowing you to reliably print thermal transfer labels directly on site even at temperatures far below 0°C.
