

One device, countless possible applications

Hybrid model of handheld and smartphone

Combines the best features of both device types for flexible use in a wide variety of working environments

Lightweight and robust

At just 190 g, the X-N model is significantly lighter than many conventional smartphones, but remains just as robust as specialised data capture devices.

Scan angle of 40 degrees

The scanning angle of 40 degrees enables convenient scanning in various positions.

Powerful processor

The powerful processor enables the fast and reliable processing of large amounts of data and the execution of complex applications.
